INTRODUCTION

With more than 600+ cryptocurrency exchanges active and over 6,500 cryptocurrencies in circulation, combining a market cap of over \$2 trillion, investors are eager to trade in the rapidly-growing DeFi space. Recent developments in DeFi- Decentralized Finance have created exponential value for crypto and tokens, by adding new and innovative technology solutions.

Cryptocurrencies are widespread and are globally accessible by anyone, anywhere, anytime. The leading technology behind the development and success of cryptocurrencies is blockchain technology. This technology works on the principle of decentralization. It provides better security, safety, and privacy. It reduces business risk and allows transparency with the key feature of decentralization. PENT is going to operate on this technology.

ABOUT PENT TOKEN

The PENT token is the proper solution to all problems with crypto coins. It is a BEP-20 network token. PNTG utilizes the power of both blockchain and cryptocurrency. Through the blockchain, it makes PNTG more secure and scalable. The blockchain can expand with its increase in blocks or users. PNTG aims to provide more and more utility and use cases through which its users can earn benefits—use cases like PNTG SWAP.

PENT TOKEN (PNTG) CONTRACT ADDRESS:

0x38ef279103736597461e822b00461e88d79fed05

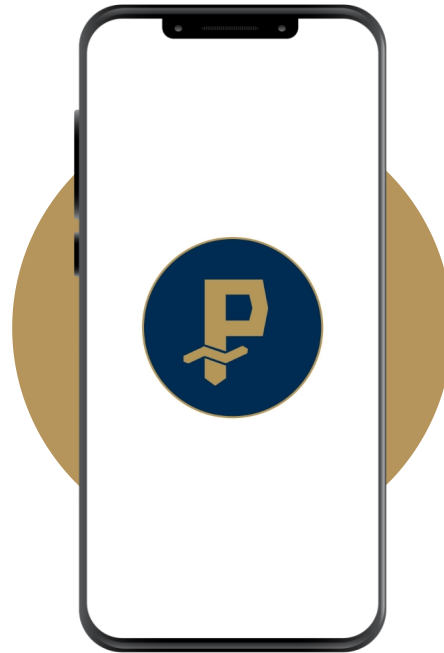

By combining the power of blockchain and cryptocurrency, we created a better token than any other token available in the market. PNTG is the first project with an actual utility on top of the community's efforts to hold and grow. You probably already know this, but with \$PNTG, you will have higher profits than any other token out there. We made it better.

PNTG's mission is to bring popular cryptocurrency concepts to the mainstream. Unlike older, similar projects, PNTG introduces holders to next-gen concepts such as PENT SWAP and more.

Just like any blockchain company, we believe that cryptocurrencies are the best financial tool that can help to bank the unbanked population, and also open them up to the already existing financial opportunities already provided by traditional banking services they previously had no access to too

PENT SWAP

PENT SWAP is a platform that initiates the trading of digital coins. Crypto Swap is a relatively new concept still, and people are yet to get the hang of it entirely. Crypto Swap allows the users to use peer-to-peer (P2P) transactions and swap any two tokens. This process relies on automated smart contracts.

PENT SWAP is a decentralized cryptocurrency swap that provides a quick and simple trading experience for its clients. As a DEX, it doesn't require users to deposit their coins on its platform. Instead, users remain in full control of their funds. This swap will allow traders to swap their tokens for another while still providing traders with full custody over their tokens.

PENT SWAP is committed to providing a sophisticated easy-to-use crypto swap application that will enable anyone to store, send, receive, exchange, and swap crypto assets at users' convenience. Users will have the option to use a decentralized financial exchange without the need to provide or store user data centrally.

OUR MISSION

The PENT SWAP's mission is to create a completely secure and reliable decentralized swap and token for crypto investors to benefit from this striving industry. PENT SWAP's platform gives users access to the types of decentralized swap that is used by the world's largest financial service providers and dozens of other trusted global brands. In addition, PENT SWAP will constantly research and provide excellent blockchain technology and cryptocurrency application scenarios that will further the adoption and use cases of cryptocurrencies.

Trading

"Swap your crypto tokens, instantly: no registration required or account needed".

PentSwap does not hold your assets when you trade, you own 100% of your own crypto unlike other centralized exchanges like Binance or Coinbase.

In PentSwap, you trade directly from your cryptocurrency wallet app and trading fees are lower than other top decentralized exchanges.

PentSwap runs on Binance Smart Chain, a blockchain with much lower transaction costs than Ethereum or Bitcoin.

OUR MISSION

Earning

“Earn PNTG and different tokens free of charge with very exorbitant loan fees”.

PentPool

With PentSwap, you can take PNTG to earn free tokens. It's actually simple.

PNTG holders are currently earning free tokens worth millions every week from big projects. Other New projects join the party consistently, so you can earn more, for much longer.

PentFarming

With PentSwap, you can stake LP tokens to earn PNTG. You take on some more exposure to market volatility than with the Pentpools, yet can earn higher APR to balance the risk.

OUR MISSION

Pent Liquidity pool

You can earn trading fees when you stake your tokens in Liquidity Pools (LPs), even if your trading pair isn't supported on the Farms page.

Lottery

Millions of dollars are up for grabs on the PentSwap Lottery, regularly.
You can join the numerous daily players for your chance to win!

Prediction

Win BNB if you predict whether the BNB price will rise or fall.

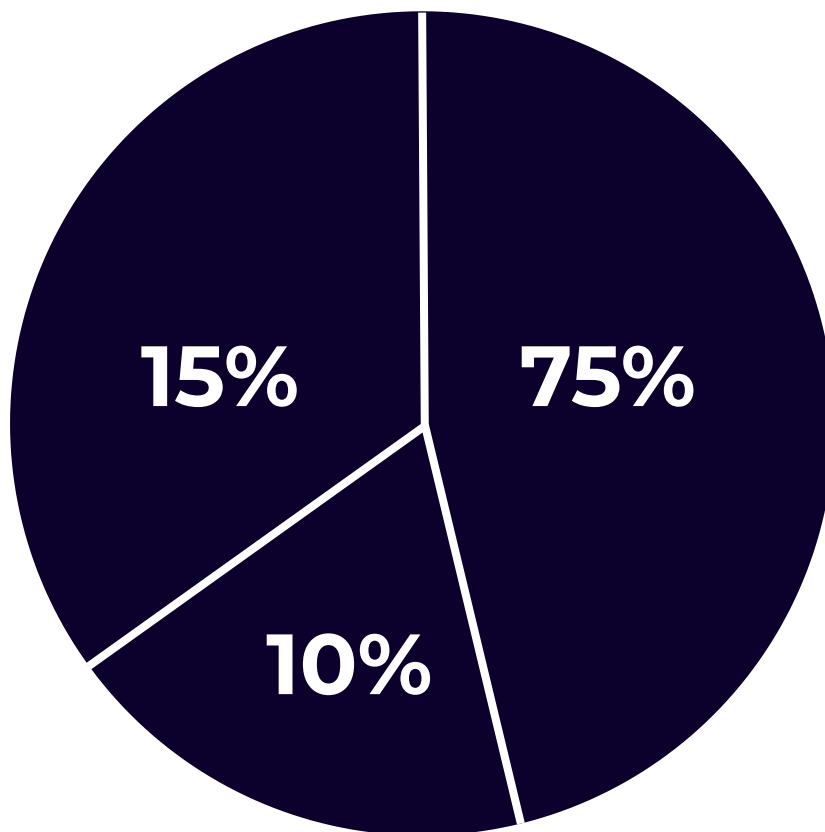

TOKENOMICS

Total Pent Token (PNTG) Supply: 500000000

Development = 15%

Marketing & team = 10%

Public usage = 75%
